On the Move—Jim Olson was one of 158 patients who relocated to new rooms in the Atrium Building over Memorial Day weekend. Carol Hauge, R.N., Sarah Ross, transport service, and Donna Nowell, R.N., assisted him. For more pictures of the move and the people who made it go smoothly, see pages 2 and 3.
A moving experience

After months of planning, it all took place over Memorial Day weekend. One-hundred-fifty-eight patients were moved from Jones and Kellogg to patient care floors of the new Atrium Building. The relocation plan was developed by a committee chaired by Sandy Seim, while the actual move was accomplished with the help of nurses, staff volunteers, and regularly scheduled transport employees.

The move began shortly before 8 a.m. on Saturday, May 29, when the first patients to cross the threshold of the new building were greeted by James A. Campbell, M.D., Medical Center president. By 10:25 a.m., 135 patients were in their new rooms—an hour and a half ahead of schedule. On Sunday, 23 more patients were moved with equal efficiency. During the previous week, a number of offices already had been moved and were operating in their new quarters on Saturday.

Patients involved in the move expressed amazement at the clockwork efficiency of the operation—after eating breakfast in their old rooms, they had time to survey their new surroundings before eating lunch in the new wing.
The move went smoothly because a large team of people pitched in to make it possible. Here are a few of the many faces behind the move—members of transport service.

A relocation control center was set up in the old admitting office to monitor progress throughout the move. Heading it up here are William Wellman, Sandy Seim, and Dwight Yoshioka.

Jan Rohlf, R.N., escorts Robert Soto to the Atrium Building.

A place for every patient.

Jim Doherty and Clinel Torry, patient financial services, prepare to move their department to its new offices in the Atrium Building.

Father Dan Grundy, one of hundreds of volunteer movers, leads a caravan of carts and equipment.

While Mrs. South rests comfortably in her new room, Mrs. Herbert C. DeYoung, trustee and volunteer, stops by to give her a special welcome.
"To all of you, Trustees and friends, the faculties, doctors and nurses, scientists, management, and employees of Rush-Presbyterian-St. Luke's—my heartfelt congratulations.

"As an academic medical center, Rush has in so many ways provided a model for the nation. To these, must now be added your role in inspiring the private sector across the nation to a spectacular demonstration of what voluntary effort can achieve. And that may be your greatest achievement."

The speaker was the Hon. Gerald R. Ford, 38th President of the United States, and the occasion was a civic dinner on May 23rd to celebrate the conclusion of the five-year campaign for private philanthropy at the Medical Center. But the message could just as well have been delivered at the dedication of the Woman's Board Cancer Treatment Center on May 7th and of the Atrium Building on May 25th.

The three occasions, each in its own way, marked the culmination of a $162 million investment in facilities, endowment, and programmatic development at RPSLMC. The Campaign for the Future of Success had exceeded its philanthropic goal of $75 million by $8 million, for a total of $83,088,605.

There were messages from the White House, from Springfield, from around the city and state, and even from Japan (from Robert Jensik, M.D., president of the medical staff, who was attending a conference in Tokyo).

But perhaps pictures tell the story best. Here they are.

Former President Gerald R. Ford, flanked at civic dinner by Harold Byron Smith, Jr., chairman of the Board of Trustees, and Dr. Campbell, president of the Medical Center.

Leadership at Woman's Board Cancer Treatment Center Dedication. From left, Mrs. Frederick M. Allen, president, Mrs. Bowen Blair, and Mrs. George S. Chappell, Jr., past presidents, and Mrs. Edward Hines, vice president.

Chicago Mayor Jane Byrne called the new Atrium Building "something we can point to with pride" at the outdoor dedication.
Friends, students, staff, and neighbors of the Medical Center came out in great numbers to celebrate the dedication of the Center's new facilities.

William F. Hejna, M.D., right, escorted Dr. and Mrs. Samuel G. Taylor III and other guests through the new building.

Dr. and Mrs. Mark H. Lepper at civic dinner.

Reginald Adams, community relations director, and Nancy Jefferson, executive director of the Midwest Community Council, relax a moment before the outdoor dedication.

Mayor Byrne and Dr. Campbell in a lighter moment.

Andrew Thomson, M.D., president-elect of the Medical Staff, and Rev. Christian Hovde, Ph.D., enjoy a remark at the civic dinner.

Inside the Atrium Building.

Spectators at the ceremony.
RPSLMC honors dedicated employees

The 1982 Founder's Day celebration honored 683 Medical Center employees with a total of 6,300 person-years of service to Rush-Presbyterian-St. Luke's Medical Center.

Employees with 15, 20, 25, 30, 35, 45 and 50 years of service were saluted at the President's Luncheon, held in Room 500, on May 11. James A. Campbell, M.D., president of the Medical Center, praised their dedication and thanked them for their services.

In addition to honoring these long-term employees, the luncheon also was the occasion for announcing the 1981 Gail L. Warden Employee of the Year Award. Donald Oder, senior vice president, presented the award to Mary Hope, clinical dietician and a Medical Center employee for 29 years. Oder praised Mrs. Hope for her "genuine liking for and understanding of people." He also cited her "uncanny ability to find the common ground with patients so that her diet instructions and teaching reflect a shrewd analysis of the patient's emotional, social and economic status."

Also announced at the President's Luncheon were six community service award winners: Prentiss Taylor, M.D., pulmonary medicine; Shirley Fondiller, Ed.D., R.N., assistant to the dean of nursing for special projects; Laurie Kuljis, M.S., food service department; Jane Warren, director, volunteer services department; Debra Killingsworth, hematology; and Jesse Mack, supply, processing and distribution.

Peter Davis, Margaret H. Taylor and Josephine Schildberg R.D. were honored for 35, 45 and 50 years of service, respectively. Davis was hired as a dietary aide at St. Luke's Hospital in 1947. He moved to Presbyterian-St. Luke's Hospital in 1959 when the merger was finalized. Since then, Davis has worked in the Central Kitchen assisting, among other duties, with patient tray service. In 35 years in food service, Davis has amassed an attendance record few can match. He has missed only 52 days in the past 20 years.

Ms. Taylor started at the Medical Center in 1937 as a stenographer. A series of promotions led her to become the Center's first woman accounting supervisor. At the time of the merger, Ms. Taylor was named liaison coordinator for the financial division. Over the years, Ms. Taylor has received both the Employee of the Quarter and Employee of the Year Awards.

Miss Schildberg came to Presbyterian Hospital in 1932 as a recent graduate of the University of Wisconsin. She began with a six-month internship which has turned into 50 years of outstanding service. Now assistant director of food service, she also is an active participant in Dietetic Association affairs and has held all offices in the Chicago and Illinois Dietetic Associations.

Employees with 10 years of service at the Medical Center were honored at a reception on May 11 in the Room 500 Lounge and addressed by Sue T. Hegyvary, Ph.D., R.N., assistant vice president and associate dean of nursing affairs. Diane Howard, M.P.H., assistant administrator of ambulatory care services, addressed 391 employees with five years of RPSLMC service at their special reception on May 12.

Celebrating her 50th anniversary, Josephine Schildberg, assistant director of food service, was honored as the employee with the longest record of service to the Medical Center. She poses here with Dr. Campbell and Peter Davis, who has been with food service for 35 years.
Margaret H. Taylor, finance, shows off the ring she received in special thanks for 45 years of service. The ring has the Medical Center logo decorated by two diamonds and an emerald.

Kenneth White and Ruby Bailey, OR personnel, celebrated 15 years at the Medical Center, as did 105 other employees.
Rush University conferred 370 degrees at its eighth full commencement on June 5 at Medinah Temple. Degrees were conferred by Harold Byron Smith, Jr., chairman of the Board of Trustees of the Medical Center, and James A. Campbell, M.D., president of the Medical Center.

Walter J. McNerney, M.H.A., immediate past-president of the Blue, Cross and Blue Shield Associations was the keynote speaker and the recipient of an honorary degree of doctor of humane letters.

This year Rush granted 124 doctor of medicine degrees, two doctor of nursing science degrees, five doctor of philosophy degrees (pharmacology and immunology), 80 master of science in nursing degrees, 12 master of science degrees in health systems management, nine master of science in clinical nutrition degrees, four master of science degrees in occupational therapy, five master of science degrees in speech/language pathology, three master of science degrees in audiology, 111 baccalaureate nursing degrees, and 15 bachelor of science degrees in medical technology.

Pre-commencement activities in honor of graduating students and alumni included a pinning ceremony for graduating nursing students and an open house in Room 500 on the morning of commencement. Student and faculty awards also were announced on the morning of commencement at the sixth annual Rush University awards ceremony.

The traditional reunion activities for Rush Medical College graduates were expanded this year to an Alumni Weekend, June 3, 4, and 5. Educational programs for Category I CME credit were a new reunion program feature. RMC's Alumni Association held its commencement banquet on June 4 at the Ritz-Carlton Hotel. Members of the Medical School class of 1982 were inducted into the Alumni Association at the banquet, while the classes of 1932, 1942, and 1977 celebrated reunions.

McNerney delivers keynote address

Walter J. McNerney, M.H.A., immediate past-president of the Blue Cross and Blue Shield Associations, was awarded an honorary degree of doctor of humane letters at Rush University's commencement exercises. McNerney delivered the keynote address.

The New Haven, Connecticut native earned his bachelor of science degree from Yale University in 1947 and a master's in hospital administration from the University of Minnesota in 1950. He began his career as an administrator with the Hospital and Clinics of the Medical Center and as a faculty member of the Graduate School of Public Health at the University of Pittsburgh.

He joined the faculty of the School of Business Administration at the University of Michigan in 1955, and, in 1958, was named professor and director of the Bureau of Hospital Administration at that university. In 1961, he joined Blue Cross Association as president, becoming president of the Blue Cross and Blue Shield Associations in 1978.

McNerney has received numerous awards and honors, including the 1982 Award of Honor of the American Hospital Association, the Special Award for Meritorious Service of the American Medical Association, the Silver Medal Award of the American College of Hospital Administrators, and the Secretary's Unit Citation of the U.S. Department of Health, Education, and Welfare.

He is the author of three books—Hospital and Medical Economics, Regionalization and Rural Health, and Working for a Healthy America—as well as many articles and monographs. He was the recipient of Hospital Management's editorial award for a manuscript entitled "What the Community Requires of the Hospital."

Honors and awards

The Nathan M. Freer Prize, endowed in 1892, is given to the outstanding senior medical student as voted by the faculty. Jay Scott Weller

The Henry M. Lyman Memorial Prize, endowed in 1908, is given each year to a junior medical student for outstanding work as voted by the faculty. Thomas A. Mayer

The David Peck Prize for the student who has made the greatest contribution to the Student National Medical Association. Lois Bernadine Collins

The Lemmon Company Student Award to the graduating medical student who has excelled in the study of family practice as demonstrated by excellence in scholarship and concern for patients. Charles Wayne Judy

The Sir William Osler Pathology Prize to the medical students who have demonstrated outstanding achievement in diagnostic or experimental pathology. John Dudley Edwards Robert John March

The Undergraduate Cardiology Award to the graduating student who has had the best performance in a cardiology elective course. Paul J. Schmidt

The Nephrology Award from the Muehrcke Family Foundation to the graduating student who has demonstrated outstanding achievement in the field of nephrology. Julieta Marimla Gabiola

The Upjohn Achievement Award to the senior medical student with the best research project. John Theodore Barron

The American Medical Women's Association Scholarship and Achievement Citation. Lois Bernadine Collins Julieta Marimla Gabiola Barbara J. Green
Rush-Presbyterian-St. Luke’s Nurse Alumni Association Award for the outstanding nurse graduate.
Vera Zubenko

College of Nursing Dean’s Award to Undergraduate Students for superior academic leadership in the undergraduate nursing program.
Ellen Margaret Bunten
Carol Bartholomew Stoner

College of Nursing Dean’s Award to Graduate Student for superior academic leadership in the graduate nursing program.
(Ro be announced August, 1982)

The Kellogg Scholarship Award to a doctoral nursing student for superior academic achievement.
Paula P. Meier

College of Health Sciences Dean’s Award to Undergraduate Student for outstanding academic performance by an undergraduate student as selected by the faculty.
Maria Josephine Mynatt

Medical Technology Faculty Award to the outstanding undergraduate student as selected by the faculty.
LaTanya Lynn Broady

College of Health Sciences Dean’s Award to Graduate Student for outstanding academic performance by a graduate student as selected by the faculty.
Paul Alan Goetzheimer

Department of Health Systems Management Award to the outstanding graduate student as selected by the faculty.
Michael Joseph Hoy

The Occupational Therapy Faculty Award to the student who has demonstrated the greatest potential for contribution to the field of sensory integration as selected by the faculty.
Colleen Anne Forssberg

The Sandoz Award, presented by Sandoz Pharmaceuticals, in recognition of superior academic achievement and contribution to health care.
Lincoln Hess

Speech and Hearing Sciences Award to the outstanding graduate student as selected by the faculty.
Janet S. Eaton

The Aesculapius Award for the outstanding resident-physician as voted by the students. Russell M. Petrak, M.D., Resident, Department of Internal Medicine

The Daniel Brainard Award for the outstanding teacher in the basic sciences as voted by the students. Anatoly Bezkorovainy, Ph.D., Professor of Biochemistry

The Phoenix Award for the outstanding physician-teacher as voted by the students. Harold L. Klawans, M.D., Professor of Neurology and Pharmacology

College of Nursing Undergraduate Faculty Award for the outstanding teaching faculty member as voted by the senior students. Llenea Carlson-Sabelli, M.S., Assistant Professor of Nursing

College of Health Sciences Faculty Award for the outstanding teaching faculty on the faculty as selected by the students. Raymond L. Kaplan, Ph.D., Assistant Professor, College of Health Sciences

Alpha Omega Alpha Honor Medical Society—Zeta Chapter
Undergraduate membership is extended to medical students who give promise of becoming leaders in the field of medicine. Members of the Zeta Chapter are:
Keith Robert Berndtson
Burton Boron
Rockne L. Brubaker
James Edward Bunn
John Dudley Edwards
Julieta Marimla Gabriola
Jeffrey Alan Goodman
Barbara J. Green
Charles Wayne Judy
Robert Bruce Love
Robert John March
David Owen Miller
Thomas Michael Pellino
George Lazaar Schiffman
Paul J. Schmidt
Robert Paul Schroeder
Greg E. Sharon
David Andrew Stewart
Joseph William Yedlicka, Jr.

*students installed as members in 1981

Sigma Theta Tau—The National Honor Society for Nursing—Gamma Phi Chapter
Membership is extended to undergraduate and graduate nursing students who demonstrate outstanding academic achievement, leadership qualities, and commitment to the ideals and purposes of the profession. Members in the Gamma Phi Chapter are:

Undergraduate Nursing
Jill Adams-Monley
Judith Ann Berndt

Commencement, 1982
Meet the graduates

Although the 370 Rush University students who were graduated at commencement exercises Saturday, June 5, are all very different, each on that day was beginning a new chapter in his or her life. Although we can’t tell you the story of all 370, we want you to meet a few of them here.

Daniel Sheridan

Ex-serviceman. Former newspaper reporter. Nurse. Feminist. All describe Daniel Sheridan who was graduated from Rush College of Nursing this spring.

The 27-year old graduate got his first taste of the health field at Dayton’s Wright Patterson Air Force Base where he spent nearly four years as a medic and operating room technician. While in the service, Sheridan worked towards a degree in journalism. He completed his Air Force stint in 1977 and a year later was awarded a B.A. in communication arts from the University of Dayton.

In what almost has become a journalism cliche, after college Sheridan worked his way up from copy boy to reporter at Dayton’s Journal Herald. Along the way, he discovered that he missed working in a medical setting and, as a result, decided to study nursing. He entered Rush College of Nursing in 1980, with the idea of combining nursing and journalism.

Although a busy student schedule combined with work as a RPSLMC nursing assistant left him little time to freelance, he succeeded in publishing a number of articles. Two—on thoracic outlet syndrome and on a study he conducted on estimating blood loss in the operating room—have appeared in Surgical Technology. Another—on a volunteer CPR program—appeared in Emergency News. Still another, published in the Chicago Catholic, took a look at preoperative teaching programs at two south side hospitals.

Thus the designations of ex-serviceman, former journalist, and nurse are explained. The feminist label—“one which I wear proudly”—has led Sheridan into other areas. In the winter of 1980, he arranged a noon forum for Rush students and staff interested in viewing a film on the subject of battered women. Attendance and interest ran high, he recalls, so he set up a second forum. This one featured Marge Josza, coordinator of the Battered Women Project of Southwest Chicago Grassroots. Not quite coincidentally, Sheridan and Josza (who is working on a master’s in social work) are husband and wife.

The noon forums led Sheridan to co-found Rush Coalition Against Spouse Abuse (R-CASA). Originally made up mostly of nursing students, R-CASA now boasts a membership primarily of Medical Center staff. Through Sheridan’s efforts and those of other volunteers, R-CASA has involved social workers, psychiatric nursing staff, legal affairs staff, and others at the Medical Center in its work to aid battered patients.

Sheridan himself has provided inservice for health care staff in the ER, the OR, OB/GYN, and at ANCHOR. He has presented educational programs on the topic at high schools, before PTAs, and at a conference for crisis hotline workers.

Under Sheridan’s leadership, R-CASA volunteers compiled more than 150 articles on domestic violence that are now available at Rush Library. More importantly, says Sheridan, the group produced a wallet-size referral card of agencies the battered patient can turn to upon leaving the Medical Center. “We had 500 cards made up and distributed them to various Medical Center personnel. They were scooped up and gone in two weeks!” More cards are forthcoming.

“Because health care staff are usually the first professionals to be in a position to help battered patients, it’s important that they’re adequately trained to deal with the situation,” says Sheridan. “What we do or don’t do may affect how the battered woman seeks future intervention.”

Sheridan is currently working with ANCHOR, emergency room, and other Medical Center units in developing formal guidelines and procedures to identify, treat, and refer battered patients. “I’d like to see medical centers around the country make reducing domestic violence a priority.”

Sheridan, who was inducted into Sigma Theta Tau, the national honor
Diana Henry

Diana Henry, a member of Rush University’s first graduating class in occupational therapy, was born in Spain, lived in France for most of her life, but had never set foot in Chicago until she came to R.U. last fall for the College of Health Sciences new O.T. master’s program.

“I came to Rush,” says Henry, “because the program I’m in is the only one of its kind in the world—it specializes in sensory integration.”

Sensory integration is a neuro-physiological approach to occupational therapy that evaluates basic sensory systems to see how they may be causing dysfunction.

“The sensory integration approach stimulates a patient’s sensory systems to enhance development and/or adaptation to disabilities,” says Henry. “For example, a child may not be able to sit up straight because of poor muscle tone in the back. We may be able to promote extensor tone in his back muscles by stimulating his sense of balance with therapy such as placing him on his stomach in a hammock and encouraging him to push himself forward and back.”

Henry has a long history of working with and helping children. As a teenager in France, she worked with other French and American volunteers in a program for mentally retarded children and helped start the first Special Olympics program in France. She spent two years at Boston University preparing for a career in special education, then decided to become an occupational therapist.

“I was frustrated by the fact that many kids I worked with had physical problems, and special education didn’t address those problems. I’ve always been very interested in movement, and I heard about a “pioneer” occupational therapist in Arizona who used movement in therapy.”

Henry transferred to Tufts University in Boston to major in occupational therapy, then completed internships in Colorado and Arizona. She settled in Phoenix and worked with handicapped children in a pre-school program, then in the public school system with learning disabled children.

Concurrently, she also worked at the Center for Neurodevelopmental Studies, Inc., a non-profit organization that uses sensory integration therapy. There she developed a sensory integrative program called “Good Beginnings” for toddlers identified as being at risk of having learning disabilities. Taking a one-year leave of absence from her school system, Henry came to Rush to strengthen her neuro-physical background and acquire teaching and research skills. She will return to Arizona in August and hopes to establish a sensory integration curriculum there at the university level.

Juggling a hectic schedule between classes, homework, and working as an O.T. at JRB, Henry found time to act as a peer counselor, someone who listens when students want to talk about their problems.

“Being at Rush has been ‘fantasique,’” says Henry. “Not only is the program full of exciting research, but the people I’ve met, both those in the program and others at the Medical Center including student affairs and library personnel, other peer counselors, and dormitory comrades, have made this a special year for me.”

Terry Pencek

Terry Pencek, Ph.D., had already celebrated his 30th birthday, was an assistant professor of neurology and physiology, and had been teaching at Rush for a few years when he decided to become a student again—this time to earn an M.D.

He received that degree June 5, as a member of the 1982 graduating class of Rush Medical College.

But the story really begins a little more than four years ago.

Terry was doing research then at the Multiple Sclerosis Center and would often see patients coming in for a doctor’s visit.

“I started to think that it would be nice to understand more about medicine. At the time I was doing animal research on a couple of drugs that I thought might work on M.S.

“Now, I don’t mean to sound trite, but that’s when I remembered something Albert Schweitzer said, something along the lines of: those who find out how to serve mankind will be...
truly happy. It got me to thinking and, gradually, it became more and more important for me to understand exactly how my research applies to the scheme of the human body. It just seemed realistic for me to go to medical school.”

The first year he stayed on as full-time professor and continued his research on nerve conduction, in addition to studies as a full-time student. It wasn’t easy.

“There were times when I had to go and teach right after listening and taking notes. I didn’t have to take the two courses I taught,” Terry joked, “but it was tough. My wife used to keep count of the hours I put in, and that first year it ranged from 105 to 120 a week.”

What about his classmates?

“At first they didn’t really understand what I was doing,” Terry said. “I was their teacher in some classes but taking exams with them in others.” The adjustment didn’t take long, though—his classmates elected him student representative on the faculty council for three years in a row.

By the second year, Terry found that he couldn’t go on with his research and keep up with his studies. However, he did get some papers published in the last couple of years, bringing his total scientific publications to about 25. During a two-month clerkship at the National Institutes of Health, he set up a lab in surgical neurology to study the electricity of brain tumors.

Teaching continued. Though he eventually stopped giving formal lectures, Terry still taught conference sections, even while he was a medical student clerk.

“When I was on medicine rotation I would leave morning report, where doctors talk about patients from the night before, and go right over and teach a conference section on, say, kidney. Naturally, I had to change into a long coat. I couldn’t go in my short coat as a student.

“A classmate once suggested that what I needed was a coat with a zipper around the hem so I could easily make it longer or shorter. There were times when that would have come in handy.”

What about the future?

“I’d be happy if, when I’m all through, I could be an assistant professor again, but this time in neurosurgery. I want to continue research and now I can do it from a different point of view, since I certainly understand a lot more about the human body. As a nerve man in physiology, I didn’t know as much about the other organs.

One of the biggest benefits, Terry says, is that now when he teaches medical students, he can give them clinical relevance.

“Instead of teaching them pure physiology, I can show them how to apply what they’ve learned. One thing that I’ve come to understand is that taking care of patients isn’t quite as exact a science as I thought it would be. I never knew I’d love patient care, but I do. Ideally, I’d like to spend half my time in research and half in patient care.”

But first there is a six and a half-year residency at the University of Washington Hospitals in Seattle. Only one candidate is selected each year and Terry was chosen over 35 others who applied. Part of the residency requirement is one year of research, which suits Terry just fine.

His wife, Pam, who’s “been really great through all this,” just earned her Ph.D. from the University of Illinois and will be doing postdoctoral work on the physiology of lactation. “I kid her and say someday you can work for me, but she’s quick to answer that someday I can work for her,” Terry says.

They’ll be leaving for Seattle later this month. Terry’s looking forward to it.
Profile: Eugene Boyd

When Rush students come into a lab class and find their equipment all set up, or instructors have all the teaching aids they need, it's because Eugene Boyd and his staff are doing their jobs. Boyd, the director of general educational resources for Rush University, is responsible for providing all laboratory set-ups, purchasing teaching aids, and managing the Multidisciplinary Laboratories and the Quick Copy Center in the Academic Facility.

"We act as a support system in the university," says Boyd, "so when students come into a lab, they can get right to work, and when instructors come to class, they can get right to teaching. Our philosophy is that we're here to do whatever we can to make education the priority."

Boyd wears other hats at RPSLMC. As an instructor in the pharmacology department of the College of Medicine, he participates in student laboratory exercises. He's also a researcher on a study of antimalarial drugs and a certified instructor in CPR.

The Rush Medical College seniors recently showed their appreciation for Boyd's conscientious efforts by choosing him to be their "hooder" at the 1982 commencement exercises, a position considered to be a great honor among the faculty.

"We get to know the medical students pretty well," says Boyd, "because the first two years their courses are laboratory intensive. I enjoy working with them because I love to see them succeed."

A Chicago native, Boyd has eight children and 10 grandchildren. His family usually helps him with his primary hobby: renovating old houses. "I enjoy working with my hands, and I decided it would be nice to give my children a building when they turned 21. So far, I've renovated about five buildings with my family."

Boyd is currently working on two houses and a vegetable garden. He usually grows enough vegetables in the summer to last all year. Boyd is also involved in several community organizations dedicated to increasing minority enrollment in health science fields and maintaining parity in the medical field. As part of these activities, he runs a preceptorship program for high school students to allow them to get laboratory experience.

"Sometimes young people think it's not necessary to be concerned with education," says Boyd. "They point to me as proof that you don't need to go to college, and I tell them they're wrong. In today's highly technological society, the only way to compete effectively is to go to school and get an education."

Employee of the quarter

Claudine Burkley, an interviewer in the employee department, is the first "Employee of the Quarter" to be named this year. Finalists for the award were Carol Anderson, radiology, Sheridan Road Hospital; Bobby Dean, hospital transport services; and Roy C. McClain, clinical biochemistry.

Also recently honored were winners of the Carol Stege Memorial Award, which gives special recognition to housekeeping and engineering personnel. Winners are Melvin Chaney and Casser Barney, housekeeping, and Ju Hwang and Virgil Kuhl, engineering.
Rush University Day

Faculty watched the festivities as students competed in outdoor events.

Potato sack race

Music by the Neuroleptics

"Sit on it!" contest

3-legged race
Dr. Russel (center) and Dr. Campbell started the day by meeting with students.

One of numerous educational exhibits

Hands-on educational activity

The soon-to-be-a-tradition Rush University Day was held in April. The occasion called off a day of classes and called for a day of learning, food, and fun.

It began with a coffee and donuts get-together and ended with a raffle of bookstore gift certificates. In between, both faculty and students participated in research presentations, exhibits, scientific demonstrations, and a vast array of athletic events. Those included sack races, balloon "Sit on it!", egg toss, and leap frog. Students also held their fifth annual Rush University Talent Show featuring the Neuroleptics.

The response to all of the events was SRO (standing room only) making it a huge success!
Rush People

Karl Zeisler

RPSLMC Appointments

Donald R. Oder, senior vice president, recently announced that the Executive Committee of the Board of Trustees, at its March 10 meeting, elected Karl Zeisler, M.B.A., J.D., to the position of vice president, finance, and chief financial officer of Rush-Presbyterian-St. Luke's Medical Center.

From 1975 to 1981, Mr. Zeisler was vice president of finance at Loyola University of Chicago, and most recently was vice president and director of education and health finance, and chief financial officer of Rush-Presbyterian-St. Luke's Medical Center.

He received undergraduate degrees from The University of Chicago and Northwestern University. He also holds an M.B.A. from Northwestern University and a J.D. from Harvard Law School.

Mr. Zeisler's office is in Room 474-M (administrative section) of the Academic Facility, (extension 5600).

Henry P. Russe, M.D., dean of Rush Medical College and vice president for medical affairs, effective April 1. In this capacity, Dr. Fried will have responsibility for the functioning of all medical, non-surgical departments at Presbyterian-St. Luke's Hospital and Rush Medical College.

Although native to Frauenkirchen, Austria, Dr. Fried received his medical education and training at The University of Chicago and Philadelphia General Hospital; he subsequently held faculty positions with Chicago, the University of Illinois and Cook County Graduate School of Medicine. In 1965 he joined the staff of the Veterans Administration West Side Hospital as clinical investigator, becoming staff physician in 1966, and then chief of hematology. He was director of the hematology laboratory at Presbyterian-St. Luke's Hospital from 1968 to 1971, later serving in the same position at the University of Illinois. He directed the division of hematology-oncology at Michael Reese Hospital and Medical Center, starting in 1976, and has served as acting chairman of their department of medicine since 1978.

Dr. Fried is a member of the Hematology Study Section of the National Institutes of Health, and also of the N.I.H.'s Erythropoietin Working Group of the Division of Blood Diseases, and serves on the Board of Trustees of the Illinois Chapter of the Leukemia Society of America. He belongs to numerous professional groups, including the American Hematology Society and the International Society of Experimental Hematology, and has served as president of the Chicago Society of Internal Medicine.

"Dr. Fried," says Dr. Russe, "is an internationally-recognized hematologist, probably best known for his pioneer experiments in erythropoietin and for his bone marrow radiation and transplantation studies. He returns to the Medical Center with outstanding research skills, and clinical talents in hematology."

Sue T. Hegyvary, Ph.D., associate dean of the College of Nursing, announces the appointment of Diana Barhyte, Ph.D., as director of the Nursing Systems Management program, which began May 1. Dr. Barhyte continues her position as director of the College's graduate programs until June 1 when she will assume full responsibility for nursing systems management.

Dr. Barhyte's undergraduate study was at St. John's College, in Cleveland, Ohio; she received the M.S.N. from Case Western Reserve University, also in Cleveland; and her Ph.D. (in organization behavior) from Cornell University, New York. Her research has been related to educational administration and management issues. In her new position she will continue direction and evolution of the Quality Assurance Program within the nursing systems management.

Coming to the Medical Center in 1978, she served in various capacities, the most recent as director of graduate programs in the School of Nursing. Dr. Hegyvary also expressed appreciation of the contributions of
Winners of the Carol Stege Memorial Award included Melvin Chanev and Casser Barney, housekeeping, and Ju Hwang, medical center engineering. Not pictured is Virgil Kuhl, also from engineering. For story, see page 11.

Jeanne Slack, M.S., who served as acting director in the interim.

Edsel K. Hudson, M.D., assistant vice president for ambulatory care services, has assumed the position of acting director of the Employee Health Service. All matters relating to the operation of Employee Health Service are to be coordinated through Dr. Hudson who will arrange to be in the employee health service, 1st floor, Senn building, a part of each working day. He can be reached at extension 5878.

Elizabeth Lauber, M.D., who has served as acting director since last July, expects to enter private practice in June; she will continue to serve on the health service advisory and worker’s compensation committees until that time.

Linda G. Olson, M.O.T., O.T.R., was appointed supervisor of psychiatric occupational therapy at Sheridan Road Hospital, with responsibility for the occupational therapy programming in SRH’s alcoholism treatment unit and stress disorder unit.

**Appointments**

William F. Hejna, M.D., senior vice president of the Medical Center and professor of neurosurgery, Rush Medical College, has been elected to the Board of Directors of MacNeal Memorial Hospital, in Berwyn. Peter Giammanco, Jr., MacNeal board chairman, stated, "Like other board members, Dr. Hejna is a long-time resident of our community and has achieved a widely recognized leadership position in areas of medicine and hospital administration."

Jeffrey K. Norman, M.P.H., administrative director, Sheridan Road Hospital, has been appointed to the nominating committee for the local chapter of the American Cancer Society. The new chapter encompasses Sheridan Road Hospital’s service area.

Joyce K. Keithley, R.N., D.N.Sc., associate chairperson of the Department of Operating Room and Surgical Nursing, has been appointed to the Institutional Review Board for the Protection of Human Subjects, of the Illinois Cancer Council.

Linas A. Bieliauskas, Ph.D., of the Department of Psychology & Social Sciences, was appointed director of continuing education, by the International Neuropsychological Society, at its annual meeting in Pittsburgh, Pennsylvania.

Anne McCormick, R.N., M.S., educational coordinator for the Perinatal Center, has been appointed to the Illinois Perinatal Advisory Committee of the Illinois Department of Public Health, for a two-year term, effective March, 1982.

Reginald (Hats) Adams, Director, Community Relations, Department of Human Resources, has been named the Henry Horner Dinner committee chairman of the Chicago Boys Clubs.

**Kudos**

Jules E. Harris, M.D., director of the Section of Medical Oncology, and the Samuel G. Taylor III, M.D. Professor of Medicine, was elected president of the Board of Directors of the Illinois Cancer Council at a recent meeting. Dr. Harris also was named as a consultant for the immunology device section of the immunology and microbiology devices panel, Bureau of Medical Devices, Food and Drug Administration, and was selected to serve on the editorial board of the Journal of Medical and Pediatric Oncology.

Ronald D. Weinstein, M.D., chairman of the Department of Pathology, has been elected an international councilor by the United States-Canadian Division of the International Academy of Pathology. He will take office at the 14th congress of the academy in Sydney, Australia, in October. He also was appointed to the medical research service merit review for basic sciences by the Veterans Administration; to the health study section for shared instrumentation of the National Institutes of Health; and to the program committee for the second national Bladder Cancer Conference.

Guy R. Matthew, M.D., Department of Radiology, was named president-elect of the Illinois Radiological Society, having served the past two years as secretary-treasurer of the society.

Franklin S. Alcorn, M.D., also of the Department of Diagnostic Radiology, was elected secretary-treasurer of the Chicago Radiological Society. Both serve as councilors to the American College of Radiology.

* Winners of the Carol Stege Memorial Award included Melvin Chanev and Casser Barney, housekeeping, and Ju Hwang, medical center engineering. Not pictured is Virgil Kuhl, also from engineering. For story, see page 11.*
Eighty-three percent of Rush Medical College seniors received their first, second, or third choice in the National Residency Matching Program (NRMP) this year. George C. Flanagan, M.D., associate dean for clinical curriculum, made the announcement and congratulated the group on their accomplishments.

Among the hospitals across the country accepting RMC graduates are Stanford University Hospital, Barnes Hospital (St. Louis), the Cleveland Clinic, and Cedars-Sinai Medical Center (Los Angeles).

The NRMP is a nationwide computerized program that matches senior medical students with the hospitals in which they will do their residencies. Students interview at hospitals of their choice and then submit a preference list. The hospitals, too, submit a prioritized list of their choices among students interviewed, and a computer matches them.

Presbyterian-St. Luke's Hospital filled 81 of its 102 residency positions through the match. New residents joining the house staff July 1 come from such universities as Yale, Harvard, and Johns Hopkins. Eighteen RMC students will join the house staff, and eight others will remain in the Rush network. Twenty-eight students will go to other Chicago area hospitals, four to other hospitals in Illinois, and 22 to Midwest hospitals outside the state. A total of 58 students participating in the match will remain in Illinois.

Medical Center secretaries celebrated National Secretaries Week with T-shirts and free balloons with the slogan "We Make It Happen." The annual fashion show, held in Room 500, featured Medical Center department models. Far right, Suzette Shepherd, finance, models a mini-skirt. At right, Beverly Cameron, physiology, makes some last minute adjustments before going on stage.

NewsRounds, May-June 1982 16
Professional Activities

**Speeches/Lectures/ Seminars**

Klaus E. Kuettnear, Ph.D., bio-chemistry—was guest lecturer at the University of Miami, in Florida, with a talk entitled “Resistance of Cartilage to Invasive Processes.”

Hassan Najafi, M.D., cardiovascular-thoracic surgery—as visiting professor of cardiovascular surgery, delivered two lectures at the Heart Institute of the Desert, Eisenhower Medical Center, Palm Springs, California. One was on manpower needs for the coming decade, and the other on “Surgical Management of Aortic Dissection and Dissecting Aneurysms.”

Brenda Eisenberg, Ph.D., Jean Sorrells-Jones, R.N., M.S.N., Jane Llewellyn and Charles Plate, parents of children at Laurance Armour Day School (LADS)—participated in a panel discussion on what influenced their choice of a scientific career, as part of a series investigating science in preschool curricula, lead by Jane C. Grady, M.A.T. and Kristin Richardson, M.S.T., of the LADS staff. Judy Purnell, assistant teacher at LADS, was guest speaker on infant-toddler day care environment, for a child development course at the National College of Education.

Gary F. Alder, D.D.S., section of dentistry—addressed the Precision Attachment Study Club on the clinical application of precision attachments.

Jennifer M. Anderson, M.D., Ph.D., with co-author Marvin Rubenstein, Ph.D., medical oncology—presented a paper on “Epithelial and Stromal Cell Separation from the Rat Ventral Prostate: Cellular Physiological Studies,” at the second Pan-American Congress of Andrology, in Mexico City, Mexico. He also presented a paper on “Identification of Histologically-Differentiated Cancers by 2-Dimensional Electrophoresis,” at the Biophysical Society meetings in Denver, Colorado. Co-authors on this paper were J. Baranowski (research assistant) and Steven Ecomomu, M.D., general surgery.

David D. Caldarelli, M.D., otolaryngology and bronchoesophagology—spoke on “Central Nervous System and Orbital Complications of Sinusitis,” “Overview of Middle Ear Effusion,” and “Tympanoplasty and the Atelectatic Ear,” at the midwinter symposium on Practical Surgical Challenges in Otolaryngology, in Aspen, Colorado.

Henry Schneiderman, M.D., pathology—lectured on “Advances in Cardiovascular Pathology,” at the University of Connecticut Health Center, Farmington, Connecticut.

Michael A. Conte, Ph.D., and Jeffrey C. Salloway, Ph.D., psychology and social sciences—lectured on “Employee Reactions and Impacts of Technological Change in Medical Organizations: A Case of a Medical Information System,” at the Center for Health Services Education and Research, St. Louis University Medical Center.

Ronette Kolotkin, Ph.D., psychology and social sciences—served as moderator for a lecture/question-and-answer session on “Psychological Aspects of Morbid Obesity,” at Alexian Brothers Medical Center, Chicago, Illinois. She also presented a paper on “A Comparison of Dropouts and Completers in a Behavioral Weight Control Program,” at the third annual meeting of the Society of Behavioral Medicine, in Chicago. Co-author of this paper was Jean M. Moore, ANCHOR Organization for Health Maintenance. At the same meeting, and with Robert Zitter, Ph.D., psychology department and family practice center of Christ Hospital, Dr. Kolotkin presented a workshop on “Adult Obesity: Assessment, Motivation, and Management,” and they also gave a short course presentation on “Obesity: Current Status and Future Directions.”

Robert S. Eisenberg, Ph.D., physiology—gave a seminar on “The Lens as a Nonuniform Spherical Syncytium,” at the University of Illinois, in Urbana.

Robert E.W. Harrison, Ph.D., psychology and social sciences—gave a seminar on “Elevation of Tryptamine and Related Metabolites as a Result of Stress: Assay by GC/MS,” at the Chicago Medical School. He also gave a seminar on “Stress Elevates Betacarbolines and Related Compounds: GC/MS Assay,” at Stritch School of Medicine, Loyola University, Maywood, Illinois.

Joyce K. Keithley, R.N., D.N.Sc., surgical nursing—served as a facilitator for round table discussions on “Nursing Research,” at the annual meeting of the American Society for Parenteral and Enteral Nutrition, San Francisco, California.

Alvin Dubin, M.S., biochemistry department and Hektoen Institute—was guest speaker at a seminar for the department of pathology at the Chicago Medical School; he spoke on “Mechanism of Cardiac Cell Death in Experimental Myocardial Infarction.”

Robert G. Hauser, M.D., cardiology—presented the following lectures: “Programmability and How It Affects Pacing System Management,” at a seminar at Mercy Hospital, Sacramento, California; “Indications for Pacing,” at a Cook County Graduate School Thoracic Board Review Course, Chicago, Illinois; and “Advances in Cardiac Pacing,” at Columbia Hospital, Milwaukee, Wisconsin.

L. Penfield Faber, M.D., surgical sciences and services—participated in the Third World Congress for Bronchoology, San Diego, California, co-chairing the panel on “Controversies and Complications in Bronchoscopy.” He also discussed a paper on “Intraoperative Fine Needle Aspiration Biopsy: A Cytologic Replacement for Frozen Section,” at the Central Surgical Association’s Clinic Day.

Members of the Department of Surgery and Surgical Sciences who participated in Cook County Hospital’s postgraduate course on Thoracic Surgery Part II, held at the McCormick Inn in April were: L. Penfield Faber, M.D., who discussed “Chest Wall Tumors, Pneumothorax, Empyema, Pectus—Thoracic Outlet Syndrome”; C. Frederick Kittle, M.D., who spoke on “Tumors of the Lung and Trachea, including Superior Sulcus Tumors and Bronchial Adenomas”; Milton Weinberg, Jr., M.D., who discussed “Vascular Rings: Patent Ductus Arteriosus”; and Giacoma A. Delaria, M.D., who spoke on various topics: Valve Replacement, Types of Valves, Valvuloplasty, Pericardial Diseases, and Tumors of the Heart.

Members of the staff of Sheridan Road Hospital recently made presentations and participated in community events as follows:

William S. Markey, M.D., medical affairs—spoke to the Senior Social Group of Emanuel Congregation, on hypertension;

Mildred Perlia, R.N., M.S.N., and Mary Vadnel, R.N., nursing, did blood pressure testing following the presentation.
Patrick Ebenhoeh, M.D., clinical psychiatry, and Susan Szczesny, R.N., M.S., nursing—described Sheridan Road's recently-opened stress disorder unit and discussed stress on WLS's radio program, Meet Your Neighbor.

Frances H. Anderson, M.B.A., administration—discussed Sheridan Road Hospital's role in the community, at a meeting of the Grandale Association, SRH's local block association.

Russell Willis-Barnes, nurse recruiting—served as chairman for the Chicago Area Nurse Recruiters' Nursing Careers Symposium, at the Knickerbocker Hotel, in Chicago.

Christina Reddy, volunteer services, SRH, and Loy Thomas, volunteer services, RPSLMI, addressed the Chicago Council of Directors of Hospital Volunteers, on "The New Volunteer Perspective—What’s Ours?"

Sue K. Donaldson, Ph.D., R.N., nursing—presented a paper on "Mammalian Skinned Skeletal Muscle Fibers: Evidence of an Ouabain-Sensitive Component of CI-Stimulated Release," at the meeting of the Biophysical Society held in Boston, Massachusetts. She also participated in a special symposium on "Contribution of Humanities to Nursing," sponsored by the University of Washington, College of Nursing. Her speech was entitled, "Relevance and Importance of Humanities in the Perspective of Nursing."

Steven Gitelis, M.D., orthopedic surgery, presented a paper at the poster session on "Limb Salvage in the Management of Bone Tumors Utilizing Fiber Metal Implants," at the American Academy of Orthopedic Surgeons' annual meeting, in New Orleans, Louisiana.

Thomas P. Andricachi, Ph.D., presented "A Study of the Relationship Between External Moments and Myoelectric Activity about the Knee," at the 28th annual meeting of the Orthopedic Research Society, in New Orleans, Louisiana. He was also guest speaker at Pennsylvania State University, University Park, Pennsylvania.

Peggy J. Lusk, M.A., staff counselor, Rush University—participated in the program and chaired the Career/Placement Committee for the national conference of the National Association of Deans, Administrators and Counselors, in Indianapolis, Indiana.

Ludwig Kornel, M.D., Ph.D., steroid unit—presented "Evidence for the Presence in Arterial Walls of Intracellulair

Molecular Mechanism for Action of Mineralocorticoids," at the meeting of the International Society of Hypertension, Newport Beach, California.

Members of the anesthesia department made the following presentations to the Chicago Society of Anesthesiologists, in Chicago:

Paul C. Land, M.D.: "Synthetic Erythrocytes."

Nabil M. El-Baz, M.D.: "High-Frequency Ventilation—Our Experience."

To the Midwest clinical conference, sponsored by the Chicago Medical Society:

Anthony D. Ivanovich, M.D.: "Anesthetic Management for Chemonucleosis."

Paul C. Land, M.D.: "Fat Embolism."

To the 4th annual spring Head and Neck Workshop, Snowbird, Utah:

At the annual meeting of the International Anesthesia Research Society, San Francisco, California:

Erica W. Ford, M.D.: "Methohexital Anesthesia in the Surgical Treatment of Uncontrollable Epilepsy."

Nabil El-Baz, M.D.: "One-Lung High-Frequency Ventilation for Lung Surgery."

John B. Stetson, M.D.: Presented an award-winning scientific exhibit on "American Pioneers of Anesthesiology."

At the Midwest Anesthesia Residents' Conference, Chicago:

Donald Murray, M.D.: "Methohexital for Surgical Treatment of Epilepsy" and "Isoflurane Anesthesia for Pheochromocytoma."

Dru Gallagher, M.D.: "Epidural Morphine Plus Steroids for Low Back Pain."

T. Stark, B.S.: "IPPV as an Alternative to IPPV for Respiratory Failure."

Meetings

Anthony D. Ivanovich, M.D., anesthesiology—attended the meeting of the Society of Midwest Anesthesia Chairmen, in Chicago; the International Anesthesia Research Society meeting in San Francisco, California; and chaired the meeting of the Chicago Society of Anesthesiologists.

William Gottschalk, M.D., anesthesiology—attended the meeting of the Council on Accreditation for the Association of Nurse Anesthetists, in Tampa, Florida.

Lawrence W. Lazarus, M.D., psychiatry (JRB), attended the GRECC Seminar Series at the V.A. Hospital in Minneapolis, Minnesota; the meeting of the American Psychiatric Association task force on psychiatric services for the elderly, at Vanderbilt University, Nashville, Tennessee; and the National Institute of Mental Health 3rd annual workshop for directors of training programs (grants), in Silver Springs, Maryland.

Jules E. Harris, M.D., medical oncology—attended the Canadian National Cancer Institute meetings in Kingston, Ontario; the National Surgical Adjuvant Breast Program annual meetings in Toronto, Ontario; the American Association for Cancer Education meetings in San Diego, California; the Eastern Cooperative Oncology Group semi-annual meetings in Philadelphia, Pennsylvania; the American Society of Hematology annual meetings, in San Antonio, Texas; and the American Association of Cancer Research and American Society of Clinical Oncology annual meetings in St. Louis, Missouri.

Arthur H. Rossof, M.D., medical oncology—attended the American Association for Cancer Education meetings in San Diego, California; the American Society of Hematology annual meeting, in San Antonio, Texas; the third conference on Human Tumor Cloning, at the University of Arizona, Tucson, Arizona; and the American Association of Cancer Research and American Society of Clinical Oncology annual meetings, in St. Louis, Missouri.

Janet Wolter, M.D., medical oncology—attended the American Association of Cancer Research and American Society of Clinical Oncology annual meetings in St. Louis, Missouri.

Kenning M. Anderson, M.D., Ph.D., medical oncology—attended the meetings of the National Cancer Institute on "Protein 'A' Plasma Phoresis Techniques," in Washington, D.C.

John Showel, M.D., medical oncology—attended the International Union Against Cancer meetings in Lausanne, Switzerland.

Barbara Fuller, M.D., medical oncology—attended cancer meetings at Harvard University, Boston, Massachusetts.

Patricia Ann Johnson, M.D., Ph.D., medical oncology—attended the third conference on Human Tumor Cloning at the University of Arizona, Tucson, Arizona.

Steven A. Sandler, M.D., medical oncology—attended the annual meetings of the American Society of Hematology, in San Antonio, Texas.

Sharon Nisius, R.N., M.S., medical oncology—attended a meeting sponsored by the Chicago Lung Association, on "Bronchogenic Carcinoma: A Nursing Challenge."

Ronald S. Weinstein, M.D., patholo-

Volunteer Irene Hine, one of 402 Medical Center volunteers, stopped in briefly at the Volunteer Services Open House. She had work to do and couldn’t stay long.

Dino Pieri and Ronald McDonald met face to face during a recent visit in pediatrics. Ronald performed tricks and passed out goodies to children on the floor.

Willa Norwood, Hope Barajas, Mary Brown, and Gennel Jones, chief operator, celebrate National Telephone Operators’ Week at an open house in the Tele-Communications Center.

Carrying out instructions to the letter can go too far. The section of Occupational Therapy ordered buttons to sport at a recent convention. The button maker was told “We want only Rush University on the buttons.” The result was 100 buttons like the one above.
